Table of Contents: Volume 28 (1998)

Number 1

Adaptive Road Recognition and Ego-state Tracking in the Presence of Obstacles ..... *Wlodzimierz Kasprzak and Heinrich Niemann* 5

Robust Shape Recovery from Occluding Contours Using a Linear Smoother ..... *Richard Szeliski and Richard Weiss* 27

New Visual Invariants for Terrain Navigation Without 3D Reconstruction ..... *Gin-Shu Young, Martin Herman, Tsai-Hong Hong, David Jiang and Jackson C.S. Yang* 45

Polarization Phase-Based Method for Material Classification in Computer Vision ..... *Hua Chen and Lawrence B. Wolff* 73

Continuous Time Matching Constraints for Image Streams ..... *Kalle Åström and Anders Heyden* 85

Number 2

Synthesis of Novel Views from a Single Face Image ..... *Thomas Vetter* 103

Quasi-Invariant Parameterisations and Matching of Curves in Images ..... *Jun Sato and Roberto Cipolla* 117

Ambiguity in Structure from Motion: Sphere versus Plane ..... *Cornelia Fermüller and Yiannis Aloimonos* 137

Stereo Matching with Nonlinear Diffusion ..... *Daniel Scharstein and Richard Szeliski* 155

Temporal Analysis of Motion in Video Sequences through Predictive Operators ..... *Philippe Burlina and Rama Chellappa* 175

Number 3

Rapid Anisotropic Diffusion Using Space-Variant Vision ..... *Bruce Fischl, Michael A. Cohen and Eric L. Schwartz* 199

Diffeomorphisms Groups and Pattern Matching in Image Analysis ..... *Alain Trouvé* 213

Epipolar Geometry and Linear Subspace Methods: A New Approach to Weak Calibration ..... *Jean Ponce and Yakup Genc* 223

What is the Set of Images of an Object under all Possible Illumination Conditions? ..... *Peter N. Belhumeur and David J. Kriegman* 245

Estimating the Focus of Expansion in Analog VLSI ..... *Ignacio S. McQuirk, Berthold K.P. Horn, Hae-Seung Lee and John L. Wyatt, Jr.* 261
